Version V0 — DRAFT

HEMATOLOGY

- Complete Blood Count (CBC), including indices
- ABO/Rh blood typing
- Clotting / Bleeding Time (CB-BT)
- Peripheral Blood Smear

CLINICAL CHEMISTRY

- Fasting Blood Sugar (FBS) · Random Blood Sugar (RBS)
- HbA1c · Capillary Blood Glucose (CBG)
- Lipid Profile — Cholesterol, Triglycerides, HDL
- Blood Urea Nitrogen (BUN) · Creatinine · Blood Uric Acid (BUA)
- SGPT · SGOT
- Electrolytes — Na, K, Cl, Ca

CLINICAL MICROSCOPY

- Routine Urinalysis — microscopic examination by manual microscope method
- Pregnancy Test (urine)
- Routine Fecalalysis
- *H. pylori* Stool Antigen Test

SEROLOGY

- Dengue Duo (NS1 / IgG / IgM)
- HBsAg
- RPR (syphilis screening)
- *H. pylori* Serum Antibody Test

NOT OFFERED IN-HOUSE — §5.3 (MANAGED BY REFERRAL, LAB-QM-PRE-002)

Microbiology culture & sensitivity · Blood Bank / Transfusion Service (crossmatching, component preparation, donor screening) · Histopathology & Cytology · Molecular testing. — ABO/Rh typing above is a Hematology examination; it is **not** a blood bank service. Examinations outside this scope are never performed or reported as in-house TCH examinations.

TWO DIFFERENT H. PYLORI TESTS: stool **ANTIGEN** (Microscopy/Fecalalysis) and serum **ANTIBODY** (Serology) are distinct examinations on different specimen types — order and report them by their full names.

BEFORE PUBLIC POSTING: LAB-QM-004 §5.12 also requires operating hours, prices (hospital approved fee schedule) and contact information to be posted — none of these are stated in the policy, so they are **NOT PRINTED HERE**; add them only from the approved schedule. FOBT is likewise **NOT** on this menu (an SOP exists but §5.2 does not list it) — flagged in the Index.
